SUPPLEMENT**

PHYSICS OF VIBRATIONS

Volume 61, Number 1, 1997

CONTENTS

Proceedings of the International School in Nonlinear Science
“Nonlinear Waves. Synchronization and Patterns”
Nizhny Novgorod, 5–16 September 1995

DYNAMICAL AND QUANTUM CHAOS

High-Dimensional Oscillations in the Lattice of Linear Elements <i>L.V. Krasichkov and A.A. Kipchatov</i>	1
Some Dynamical Properties of Large Groups of Time-Delayed Oscillators <i>E.S. Mchedlova</i>	6
Chaos in a Quantum Semiconductor Structure in Tilted Magnetic Field <i>V.Ya. Demikhovskiy and V.A. Denisjuk</i>	10
Properties of Time Delay in Quantum Chaotic Scattering <i>N. Lehmann, H.-J. Sommers, D.V. Savin, and V.V. Sokolov</i>	15

SOLITONS AND SELF-ORGANIZATION

Stationary and Quasistationary Solutions of the Complex Ginzburg–Landau Equation <i>M. Bazhenov, K. Gorshkov, M. Rabinovich, and T. Bohr</i>	22
Elastic Soliton Excitations in a New Double-Mode Model of DNA <i>O.V. Usatenko and S.V. Denisov</i>	28
Self-Organization of Blood Supply in Biological Tissues <i>B.N. Klochkov and A.M. Reiman</i>	34
Self-Structures and Rhythms in Coupled Arrays of Oscillators <i>G.V. Osipov and M.M. Sushchik</i>	41
Dynamical Criterion of a Collapse in the Nonlinear Schrödinger Equation <i>P.M. Lushnikov</i>	46

NONLINEAR HYDRODYNAMICS

Canonical Theory of Nonlinear Wave Interaction in a Rotating Fluid <i>A.A. Kurkin</i>	52
Two Examples of Normal Forms for the Shallow Water Equations <i>S.B. Medvedev</i>	56
Initial Stages of a Laminar–Turbulent Transition in Current-Carrying Plasmalike Media <i>N.B. Volkov, N.M. Zubarev, O.V. Zubareva, and A.M. Iskoldsky</i>	60
