

# PHYSICS OF VIBRATIONS

Volume 7, Number 2, 1999

## CONTENTS

### CHAOTIC MODELS

- Predictability of Linear and Nonlinear Autoregressive Models  
*O.L. Anosov, O.Ya. Butkovskii, Yu.A. Kravtsov, and V.A. Protopopescu*..... 61

### OPTICAL SPECTROSCOPY

- Temperature Anomalies in Water Raman Spectrum: Identification of Phase Transformations  
in Hydrogen Bond Network  
*A.F. Bunkin, G.A. Lyakhov, N.V. Suyazov, and S.M. Pershin*..... 75
- Four-Photon Spectroscopy of Molecular Librations in Water Solution of Electrolytes  
*N.P. Andreeva and A.F. Bunkin*..... 81
- Correlation between Optical Absorption Spectra and Microwave-Induced Luminosity  
of Saturated Sulfur Vapors  
*E.A. Vinogradov, G.A. Lyakhov, and K.F. Shipilov*..... 85

### UNDERWATER ACOUSTICS

- New Model of Sound Field Fluctuations in Shallow Water with Boundary Roughness  
and Volume Inhomogeneity  
*V.V. Borodin and M.Yu. Galaktionov*..... 89

### FLUID MECHANICS

- Fluid Mass Transfer in a Channel with Vibrating Elastic Walls  
*I.V. Shugan*..... 107
- Periodic Wave Motion over a Sloping Bottom  
*A. Shermenev and M. Shermeneva*..... 118

### ACOUSTO-OPTICAL MEASUREMENTS

- Object Displacements Measured by Acousto-Optical Methods  
*S.M. Kolomiets*..... 123
