High-Resolution Optical Spectroscopy

- High-Precision Spectroscopy with Diode Lasers. Deviation of Gas from Ideal Behavior
A. I. Nadezhdinskii and Ya. Ya. Ponurovskii 169
-

Nonlinear Optics of Nanostructures

- Giant Kerr Nonlinearity for Three-Coupled-Quantum-Well Nanostructures
A. Raheli 182
-

Propagation of Multibeam Optical Radiation

- Structure of Electromagnetic Fields in Crossed Gaussian Beams
A. V. Borovskiy and A. L. Galkin 191
-

Temperature Dynamics in Nanocrystals

- Heating and Cooling Transients in the DyPO₄ Nanocrystals under Femtosecond Laser Irradiation in the NIR Spectral Range
S. G. Fedorenko, I. D. Romanishkin, A. S. Vanetsev, I. Sildos, A. V. Ryabova, V. B. Loschenov, and Yu. V. Orlovskii 198
-

Broadband Excitation of IR Radiation

- IR Emission of Single-Crystal Silicon Excited by Broadband Light
E. L. Terpugov, O. V. Degtyareva, V. S. Gorelik, Yu. A. Novikov, and V. V. Savranskiy 207
-

Lasing of Solid-State Lasers

- Generation Dynamics of Coupled Pulses from a Single Active Element of the End-Pumped Solid-State Laser: Experiment and Simulation
D. N. Mamonov, S. M. Klimentov, S. I. Derzhavin, and Ya. V. Kravchenko 214
-

Dynamics of Liquid Clusters in an Electrical Field

- Damping Oscillations of Microdroplets of a Droplet Cluster in an External Electric Field
D. N. Gabyshev 221
-

Gravity-Capillary Waves

Explosive Instability of Gravity-Capillary Waves under Ultrasound Radiation Pressure
V. Preobrazhensky, V. Aleshin, and P. Perno

234

Numerical Methods for Solving Nonlinear Wave Equations

A Linear Energy-Preserving Finite Volume Element Method for the Improved Korteweg–de Vries
Equation
Jin-Liang Yan, Liang-Hong Zheng, and Zhi-Yue Zhang

243
