Vol. 31, No. 2, 2023

Synthesis and Diagnostics of Micro- and Nanostructures

- Mapping of the Optical Breakdown Threshold in CVD Diamond
*T. V. Kononenko, K. K. Ashikkalieva, V. V. Kononenko, A. P. Bol'shakov,
V. G. Raľchenko, and V. I. Konov* 59
- Structural Phase Transitions in the Chemisorbed Chlorine Layer on Ag(100)
B. V. Andryushechkin and B. A. Loginov 67
- Effect of Silicon Carbide Nanoparticles on the Characteristics of Organic Sensitizers in Solar Cells
S. I. Rasmagin 74
- Electronic Properties of Magnetic Semiconductor Compounds TlFeS_2 and TlFeSe_2
*Z. A. Jahangirli, R. G. Veliyev, Z. I. Badalova, R. G. Seyidov, E. H. Alizade,
T. G. Mammadov, and N. A. Abdullayev* 84
-

Physics of Aqueous Solutions

- Physicochemical Methods of Studying Hydrogen Peroxide for Biomedical Applications
E. V. Stepanov and I. A. Shcherbakov 92
- Concentration Dependence of Adiabatic Compressibility of Aqueous 4-Methylpyridine Solutions at the Hypersonic Frequency
N. F. Bunkin, L. M. Sabirov, and D. I. Semenov 98
- Positronium Annihilation in Freshly Defrosted Thawed Water
L. I. Zemskaya, O. V. Ilyukhina, M. V. Karpov, and S. V. Stepanov 105
-

Microwave Radiation

- Dielectric Field Concentrator of Microwave Radiation
V. I. Golovanov, N. V. Suyazov, and K. F. Shipilov 110
-

Nonlinear Waves

- Statistical Properties of 3-D Waves Simulated with 2-D Phase-Resolving Model
D. Chalikov 114
-

Phase Transitions in Shock Waves

- Equation of State of Hafnium at High Pressures in Shock Waves
K. V. Khishchenko 123
-
-
