Vol. 31, No. 5, 2023

Optical Data Processing

Fabry–Pérot Resonances in Planar Metal–Insulator–Metal Structures for Optical Data Processing:
A Review

D. V. Nesterenko, S. Hayashi, and V. Soifer

293

Optical Spectroscopy

Manifestations of the Dicke Narrowing at Fast Recording of High-Resolution Absorption Spectra
Using Frequency-Tunable Lasers

V. V. Lagunov, V. N. Ochkin, and A. I. Volkova

312

Passive Thermal Compensation of the Spectral Characteristic of the Integrated-Optical Demultiplexer

I. G. Likhachev, D. A. Gur'ev, V. I. Pustovoy, and K. E. Pevchikh

320

Airy–Gauss Beam in Optical Manipulation Problems

V. A. Makarov and V. M. Petnikova

327

Acoustics and Hydroacoustics

Dust Acoustic Solitary Waves with Vortex-Like Ion Distribution in Two-Dimensional
Spherical Geometry

Rasool Barazandeh Kian and Mohammad Hossein Mahdieh

332

Range of Detection of Underwater Sound Source

V. M. Kuz'kin, S. A. Pereselkov, S. A. Tkachenko, Yu. V. Matvienko, and Yu. A. Khvorostov

339

Robustness of Holographic Processing of Hydroacoustic Signals in the Presence
of Intense Internal Waves

V. M. Kuz'kin, S. A. Pereselkov, M. Badiy, N. V. Ladykin, A. Yu. Malykhin, and S. A. Tkachenko

346

Wave Structures and Their Diagnostics

Influence of Water Vapor on the Spatial Oscillations of the Average Electron Energy in Helium
in a Constant Electric Field

N. A. Dyatko, I. V. Kochetov, and V. N. Ochkin

355

A Novel Method for Measuring the Concentration of Liquids using Helical Long-Period Fiber Gratings

Yong Tang, Qiuyue Ran, Yulong Lian, and Yunfeng Bai

363
