

# PHYSICS OF VIBRATIONS

Volume 6, Number 2, 1998

## CONTENTS

### COHERENT TRANSIENT PHENOMENA

- Time-Delayed Second Harmonic Generation in an Atomic Vapor of Cesium  
*A.I. Lvovsky and S.R. Hartmann*..... 99

### NONLINEAR OPTICS OF ATOMIC GASES

- Ionization Reduction and Enhancement for Model Atoms in Super-Strong Laser Radiation  
*J.W. Braun and Q. Su*..... 109
- Polarization Effects in Radiative Interaction with Multilevel Quantum Systems  
*A.A. Apolonsky, K.A. Nasyrov, and A.M. Shalagin*..... 117
- Effect of a Strong Driving Field upon the Spontaneous Decay in Resonant Four-Wave Mixing  
*S.A. Babin, E.V. Podivilov, and D.A. Shapiro*..... 123

### QUANTUM INTERFERENCE PHENOMENA

- Quantum Theory of Pulsed Subrecoil Cooling of Atoms  
*A.V. Taichenachev, A.M. Tumaikin, and V.I. Yudin*..... 133

### NONLINEAR PHENOMENA IN PLASMA

- Strong Field Effects in Spectroscopy of Degenerate Metastable Atoms  
*I.A. Kartashov, A.V. Shishaev, and S.G. Rautian*..... 143
- Saturation Spectroscopy of Ion Metastable States in Plasma  
*S.A. Babin, S.I. Kablukov, and D.A. Shapiro*..... 150

### NONLINEAR OPTICAL PHENOMENA IN SOLIDS

- Discrete Optical Media and a Generalized Method of Integral Equations in Molecular Optics  
*G.I. Surdutovich and A.V. Ghiner*..... 158

### LASER CONTROL IN HIGH ENERGY PHYSICS}

- High Energy Photon-Photon Colliders  
*V.I. Telnov*..... 168
- Polarized Laser Beam as an Anisotropic and Gyrotropic Medium for High-Energy  $\gamma$ -Quanta  
*G.L. Kotkin and V.G. Serbo*..... 181
