

PHYSICS OF VIBRATIONS

Volume 10, Number 2, 2002

CONTENTS

OPTICAL SPECTROSCOPY

- Study of Cluster Molecular Structures in Various Types of Liquid Waters
Using Spontaneous Raman Spectroscopy
A.F. Bunkin, A.A. Nyrmatov, and S.M. Pershin61

NONLINEAR SPECTROSCOPY

- Modification of Low-Frequency Spectrum of Four-Photon Scattering in Heavy
and Light Water Under Microwaves
A.F. Bunkin and A.A. Nyrmatov66

NONLINEAR ACOUSTICS

- Evaluation of the Thermal Nonlinear Self-Action of the Intensive Acoustic Beam in Air.
Thermal Self-Focusing
E.A. Vinogradov and K.F. Shipilov72

REMOTE SENSING OF NATURAL MEDIA

- Local Calibration Principle as Applied to Determination of Extinction Coefficient in Atmosphere
by Two-Position Sensing Schemes
A.V. Bukharin78
- Sound Scattering by Vortical Structure Formed in Air Flow Behind Array of Cylinders
A.B. Ezersky, P.R. Gromov, P.L. Soustov, and V.V. Chernov87
- Method of Measurement of Vibrational Velocity on Ultrasonic Source Surface:
Numerical Analysis of Accuracy
A.V. Morozov, O.A. Sapozhnikov, and Yu.A. Pishchalnikov93
- Physical and Mathematical Modeling of Geodynamic Processes
A.O. Faddeev and I.A. Maslov100

GENERAL THEORY OF VIBRATIONS

- Loop Forces Method in Mechanoacoustic Network Analysis
V.M. Shakhparonov116
