

PHYSICS OF VIBRATIONS

Volume 8, Number 4, 2000

CONTENTS

PHASE TRANSITIONS

- Ice Formation Features in Bound Water Surface Films Studied by Radiophysical Methods
V.A. Ilyin, E.Yu. Bakhtina, O.Yu. Eshevsky, M.A. Korzhavchikov, and A.V. Frolov 209

OPTICAL SPECTROSCOPY

- Impact of the South Atlantic Anomaly on the Atmospheric Transparency
S. Pershin, R. Shellard, S. Puliaev, A. Andrei, and J.L. Penna 217

NONLINEAR ACOUSTICS

- Wave Phase Conjugation of Surface Acoustic Waves at the Phonon–Plasmon Interaction
in an External Light Field
V.G. Mikhalevich and V.N. Streltsov 225
- Spatial Scanning at Parametric Wave Phase Conjugation of Sound Beams
V.G. Mikhalevich and V.N. Streltsov 228

FLUID MECHANICS

- Comparison of Hydrosol Drift in Acoustic Waves, and on the Liquid Surface in Gravitational Waves
S.M. Kolomiets 232

WAVES ON NATURAL MEDIA

- Hydrokinematic Mechanism of the Earth's Vibration Excitation
A.G. Inozemtsev, S.A. Inozemtsev, and I.A. Maslov 238

UNDERWATER SOUND

- Numerical Simulation of Active Damping of Acoustic Fields
V.V. Borodin and A.K. Lychagin 242

STATISTICAL RADIOPHYSICS

- On the Applicability of the Nyquist and Callen–Welton Quantum Formulas
Yu.L. Klimontovich 260
