Vol. 33, No. 6, 2025

Cyclic and Stochastic Phase Transitions and Dislocations

Mechanisms of Phase Transitions near the Melting Curve of Water

G. A. Lyakhov, E. A. Zheligovskaya, and N. V. Suyazov 415

Identification of the Surface Phases Formed on the Ag(111) Face during Molecular Oxygen Adsorption at Room Temperature

B. V. Andryushechkin, T. V. Pavlova, V. M. Shevlyuga, A. V. Nartova, and V. I. Bukhtiyarov 424

Stability of Structural and Optical Properties of the Two-Dimensional WSe₂ Monolayer at the Formation of a Spintronic Heterostructure for THz Emitters

A. V. Gorbatova, A. M. Buryakov, E. A. Karashtin, M. N. Drozdov, and E. D. Mishina 434

Wave Propagation in Natural and Artificial Environments

Obtaining a Spiral Standing Wave Using Wave Phase Conjugation of a Vortex Ultrasonic Beam

L. M. Krutyansky and R. V. Klopotov 440

Localization of a Sound Source in a Waveguide Using a Neural Network Trained on Data from Calculation of Stable Field Components

A. L. Virovlyansky and A. Yu. Kazarova 448

Phenomena in Strong Electromagnetic Fields

Dynamics of Nanoparticle Distribution in Liquid Suspensions in a Laser Beam

A. F. Bunkin, V. G. Mikhalevich, V. B. Oshurko, and V. N. Strel'tsov 458

Modeling Exposure of Additively Manufactured Metallic Materials to Laser Pulses of Complex Temporal Shape

S. A. Solokhin, A. E. Shepelev, I. V. Shilov, M. N. Ershkov, A. A. Zhokin, and A. V. Bogdanov 463

Wave Methods of Measurements

Interferometric Fiber-Optic Magnetic Field Sensor

I. G. Likhachev, V. I. Pustovoy, and V. N. Sorokovikov 468

Advanced Spectroscopic Ellipsometry Analysis of Thickness-Dependent Optical Constants and Surface Morphological Variations in Aluminum Thin Films

Kh. N. Ahmadova, S. H. Jabarov, M. N. Mirzayev, and P. L. Tuan 473
